

Does One Size Fit All

“One Solution to all your needs”, usual one liner tagline adopted by most organizations, ends up in becoming either not enough or too much of what is really needed

This is where Aumtech makes a huge difference. KARES Nxg, is offered in both SaaS and Enterprise license, delivers what is needed today and allowing it to grow along with your business. Its RAD framework making it easy to adopt and adapt with changing business processes.

What makes it different?

The RAD framework based on Aumtech’s proprietary WAVEIC model makes it scalable, robust and easily customizable and quick to deploy. It comes in four flavors, namely Lite, Plus, Advanced and Enterprise. First three flavors are available in the SaaS model as well.

Salient Features

- Multi Processor Boarding
- Setup your complete business network of ISOs / Agents on the fly
- Provision to maintain multiple departments and department heads at all level
- Data provisioning completely profile based and the profiles are setup dynamically by the administrator. The deviations can be maintained at the user level as well
- SSO allows single click movement across various modules (depending on ACL)
- Power Users can switch between roles on the fly in the same login
- Ability to define sell / buy rate of all earning / expense components and with same / different split rates b/w MSP / ISO / Agents. Also provision for cash advance and bonus / commission definition with n number of periods
- Inbuilt plug ins of Data Mart, Data Warehousing, Business Intelligence and OLAP as it is based on WAVEIC framework
- Computes batches / residuals of around 10K merchants within 30 seconds
- Online Portfolio depiction in chart and classified data mode available on few clicks

Testimonials

“We look forward to the opportunity this type of Product offering will bring to our ISO base. Not only will it streamline the GETI application process, but it will also provide the ISO with valuable tools to monitor and strengthen their relationship with us. The KARES development now provides our small to mid-sized ISO groups with a functionality that is historically been found only with the larger partners with the IT resources to build out a custom solution internally”

John Laurell, VP – Technical Operations, GETI

WAVEIC framework allows instant OLAP on KARES data mart

**“ONE STOP SHOP FOR
MERCHANT ACQUIRING AND
RETENTION SOLUTIONS,
AVAILABLE AT FINGER TIPS.”**
